"Effective strategies in students' reading education"

Reading books - a process of self-discovery

Guna Alksne,

Teacher of Latvian language and literature

Jelgava, 2022

I will teach you to love Raini...

Important aspects of promoting reading at school

- The curriculum, the thematic plan - the unquestioned direction of the educational process.
- Immersion in reading art literature.

One hour with a book

One hour with a book

QUESTIONS ON THE WORKSHEET–

- What author's work (title) have I read?
- What did I read in 60 minutes?
- What 3 insights did I take away from the work?
- The fate of which character (his/her actions, beliefs, etc.) particularly aroused my sympathy? Why?
- How would I describe the language (vocabulary, artistic expression) of the work? Examples.
- How did it feel to hold the book in your hands and read it for 60 minutes straight? Why?
- Why, when reading an interesting literary work, is it possible to forget, to relax from the daily rush, stress, mandatory duties?
- Color, mark or write down your feelings in 3 places - during the task (reading) - at the beginning; during the process; at the end.

Conclusions from such lessons

1. Different experiences of young people reading books.
2. Interesting atmosphere during the lessons.
3. The feeling of a job well done at the end, an invitation to repeat the reading in other lessons.

The reading process is facilitated by:

- *a good book;*
- *the right atmosphere;*
- *providing time exclusively for reading.*

Benefits of participating in the project

1. Reference materials in lectures (reading as a process; its changes in the digital age).
2. The National Library in Vilnius - closer to the needs of society.
3. The colors of Alytus, the architecture of Vilnius.

Thank you for your attention!
